Author Prepared Manuscripts in REVTEX
(Journal of Chemical Physics, Fall, 1992)

The American Institute of Physics is now accepting copies in electronic format of manuscripts which have been accepted for publication in the Journal of Chemical Physics. The manuscripts should be in a special Tex format, REVTEX, which can be translated by AIP to the form appropriate for their composition system. A REVTEX copy of the manuscript in FINAL ACCEPTED form can be sent to the Editorial offices of the Journal of Chemical Physics. It will be forwarded to the AIP with the manuscript.

Information on REVTEX can be obtained from:

Peggy Sutherland
American Institute of Physics
500 Sunnyside Boulevard
Woodbury, L.I. NY 11797
(516) 576-2335

The REVTEX macros themselves are available in three ways:

1. on floppy disk from AIP;
2. via e-mail from a fileserver by sending an e-mail message to:

   fileserv@shsu.edu
   subject:SENDME REVTEX
   containing the two words
   SENDME REVTEX; or
3. via ftp from labrea.stanford.edu
   login: anonymous
   password: your userid
   cd pub/tex/contrib/aps
   mget *
   (after transferring the files, "quit").

The direct use of author generated files for composition by AIP is in the trial stage. The use of REVTEX and adherence to the strict REVTEX format is currently required in order for AIP to make use of this format. On a trial basis we will accept such manuscripts on floppy disks (hopefully soon by ftp or e-mail). A properly prepared paper copy is, of course, required as well.

REVTEX is an electronic publishing product of the APS.

John C. Light, Editor
Journal of Chemical Physics
